Autofil™ PETG Storage Bottles

roushlifesciences.com

- **Auto**fil™ design includes ergonomic bottle shape, molded finger grips, and patented bottle cap
- Gas and impact resistant
- Conveniently sold presterilized
- Also available in Polycarbonate and Polystyrene
- Non-cytotoxic
- Non-pyrogenic

Warnings and Guidelines

- Do not autoclave
- Do not heat
- Low temperature stability
- Good cold resistance
- Gas impermeable
- Appropriate for weak acid and alcohol
- Disposable
- Sterilized by gamma irradiation

ISO 9001
ISO 13485

Roush Life Sciences' disposable laboratory storage bottles have been designed specifically for Life Science researchers to store common laboratory solutions such as tissue culture media, serum and buffers. Our PETG bottles are optically clear and offer better impact resistance than polystyrene storage bottles. They are gas impermeable, radiation sterilized and are an ideal low cost choice for general laboratory solution storage.

Each **Auto**fil™ bottle has features that improve the handling of the bottle especially when the bottle is wet. The bottle itself has a slopped-side design that improves stability when placed on the work surface. The narrow bottle shoulder combined with molded finger grips improves the ability to securely grip the bottle with gloved hands. Lastly, the patented SECURE*grasp*™ bottle cap enables easy handling and carrying of the bottle. This innovative cap also allows for easy uncapping, tightening and bottle stacking and provides a large surface for bottle labeling.

1. Flat Writing Surface
2. SECURE*grasp*™ Bottle Cap
3. Additional Head Space to Allow 15% Dilutions
4. **Auto**fil™ Bottle Holds
5. Crystal Clear Bottle
6. High Visibility Graduations
7. **Auto**fil™ Stable Base
